## HUBER Барабанна решітка LIQUID

Ultra fine Rotary Drum Screen with two-dimensional effect for very fine particulate material

- Separation of hairs, fibres, fine suspended material
- Fine screen, river and sea outfall
- Service water recovery
- Defined separation size
- COD/BOD reduction

### APPLICATIONS

#### ■ Separation of hairs, fibres and suspended material from municipal and industrial wastewaters

Preliminary separation of fine material is very important for Membrane Bioreactors, amongst other technologies, since such fine material can not only impair the plant's performance, but also cause major operational problems.

#### ■ Reduction of COD/BOD<sub>5</sub> in river and sea outfalls

Where river and sea outfalls have only a mechanical treatment stage, it is important to reduce the oxygen-consuming loads in the wastewater to avoid eutrophication of the receiving water. The RoMesh® Screen is able to reduce BOD<sub>5</sub> by 20% and filterable solids (AFS) by 50% and thus can meet the required discharge standard. Even better performance can be achieved with prior precipitation and flocculation.

## преимущества

### THE BENEFITS OF THE ROMESH® SCREEN

- The square mesh provides a defined separation size
- Low headloss
- Mechanical COD/BOD reduction by up to 30 %
- Filterable solids (AFS) reduction by up to 60 %
- Optional periodic high pressure cleaning (120 bar)
- Addition of precipitants and flocculants reduces AFS up to 95%, COD/BOD up to 65%, phosphorus up to 60%.
- Enclosed, compact design
- Very high hydraulic throughput

## примеры из практики

- Implementation of economically efficient septic tank systems in the range of 10,000 to 20,000 p.e.
- HUBER Drum Screen LIQUID - innovative overall process succeeds in Norway
- Busy - the mobile plants with HUBER Drum Screen LIQUID help in planning and operation
- HUBER supplies a process system as replacement for the primary settling tank
- Carbon removal with HUBER fine screening technology – a success story
- New product HUBER Drum Screen LIQUID: Increasing requirements need adapted solutions
- Mechanical wastewater pre-treatment for membrane bioreactors
